

We're **NEURALAB**
**The best web &
eCommerce
agency you've
never heard of.**

VALUES

Where values shine, partners align

We specialize in **design & development** of complex web projects - the kind that outgrow napkin doodles fast. From **eCommerce platforms** to web apps, intranets, and portals, we're your hands-on team guiding you through every nook and cranny of the build.

N

eCommerce / WooCommerce

From concept to checkout, we build online stores that never close, never crash, and never call in sick.

Tailor-made web / WordPress

WordPress builds from the ground up - pixel-perfect & scalable. And yes, bigger logo is included.

Certificate?

Certified, verified, and mildly obsessed with quality.

Custom development and UX / UI

When off-the-shelf won't cut it, our designers and engineers roll up their sleeves and start crafting something truly yours.

Omnichannel for eCommerce

We blend Infobip or Mailchimp into seamless omnichannel flows for your eCommerce stack. With a sprinkle of exquisite copywriting.

VALUES

We're all about the open web

From web portals and eCommerce platforms to slick digital interfaces, we deliver **award-winning design**, future-ready technology, and support that **never clocks out**.

N

Open Source

Open online standards and web applications are Neuralab's bread & butter. And we like our butter spread thick.

Remote. Underwear optional

Fully remote, low on meetings, high on output. We write, design, and code asynchronously - think first, create second. And yes, phone calls are still reserved for our moms.

Users. Front and center

Accessibility, performance, and mobile readiness are non-negotiable. Because your users deserve better than "good enough."

P.S. Even our better halves approve

Don't just take our word for it! [Adorio](#) and [Clutch](#) have the receipts, with high-mark reviews of our production quality.

TEAM

The arts & crafts brigade

A creative mix of developers, designers, and PMs crafting digital experiences that make **businesses click, convert, and come back.**

We're fluent in JavaScript, CSS, PHP... and the occasional bad joke.

Turning concepts into reality, one step at a time

STEP 1

Layouts & concepts

- Research & analysis
- Collaborative workshops
- Clear project specs
- Defined roadmap

STEP 2

Design

- Brand identity & guidelines
- Wireframes & prototypes
- Web + app design
- Motion design

STEP 3

Development

- eCommerce & web portals
- Custom webshops
- Third-party integrations & technical consulting

STEP 4

Testing & monitoring

- User-interaction testing
- Server & performance monitoring

STEP 5

Learn & improve

- Collect data & user feedback
- Continuous improvement & versioning

CLIENTS

Projects

Z

Filming in Croatia

Challenge

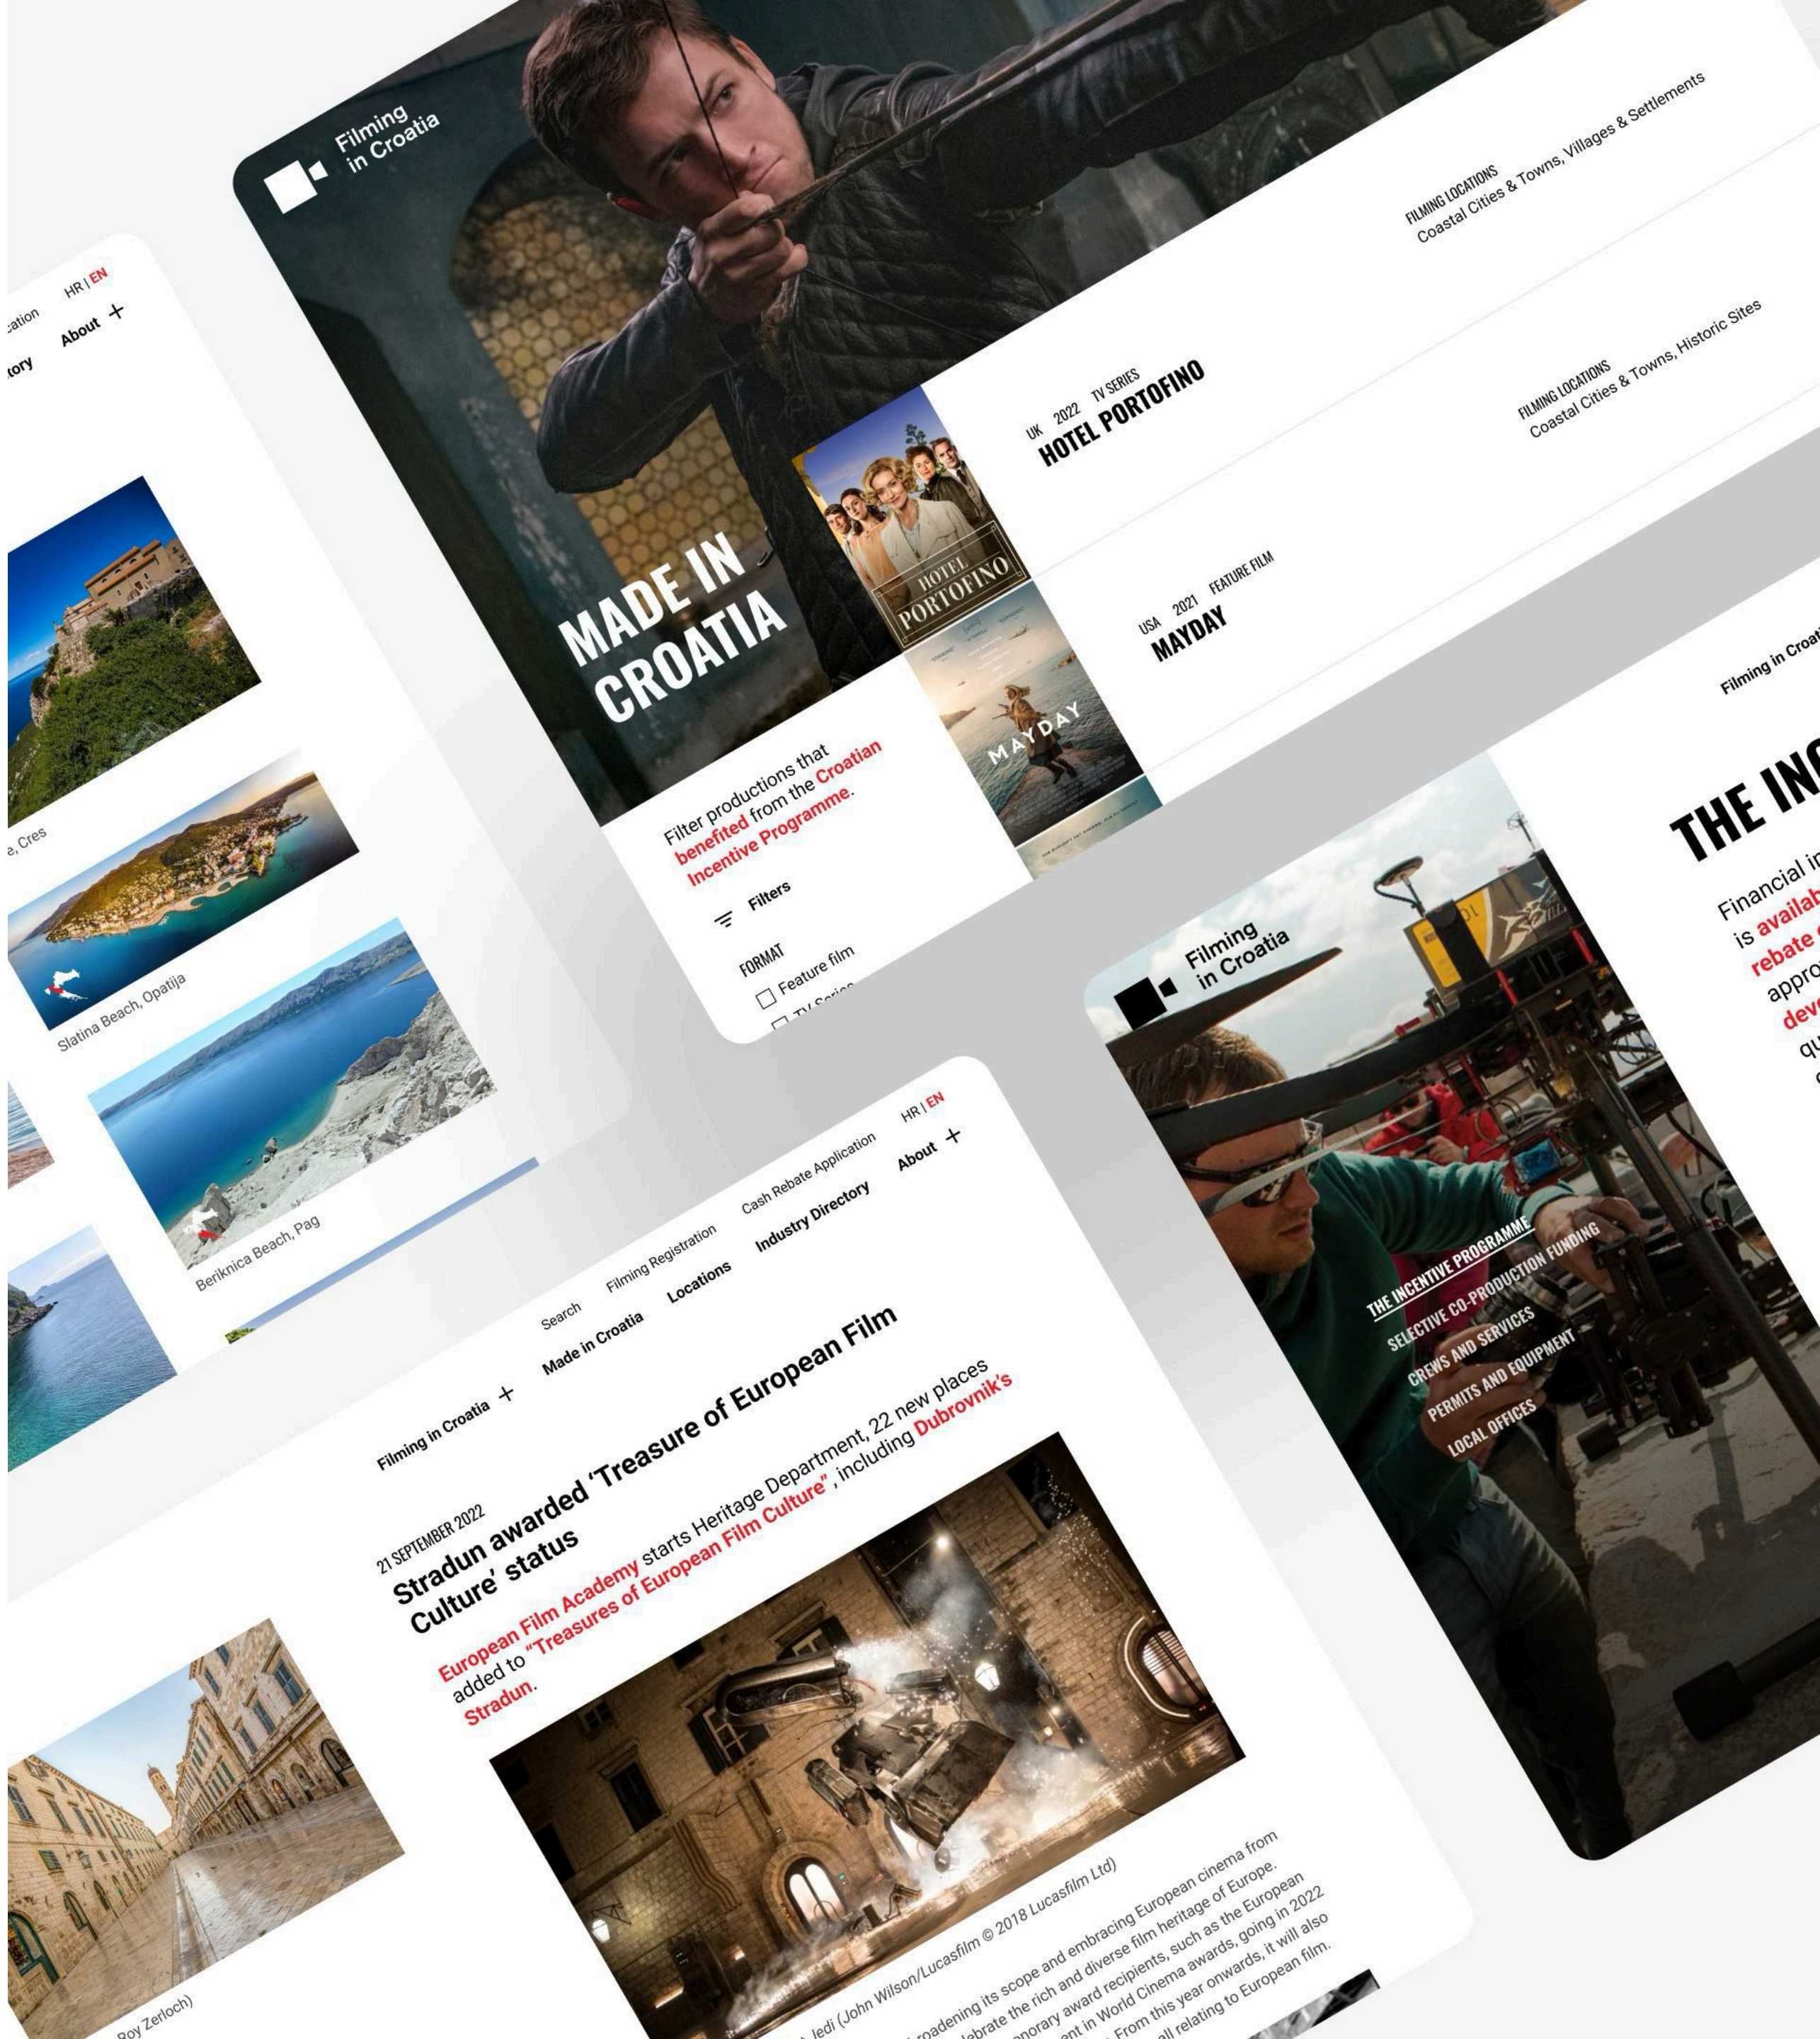

Showcase Croatia’s cinematic potential and attract international film productions with a compelling digital experience.

Solution

We built a custom WordPress platform that puts Croatia’s cinematic beauty on the map. Literally! With 370+ locations grouped into clusters, categories, and an interactive map, producers can scout their next shoot in just a few clicks.

370+ locations
for filming

N

PROJECTS

IUCN Save Our Species

Challenge

Turn conservation clicks into real-world impact by helping IUCN connect with supporters and new donors across the globe.

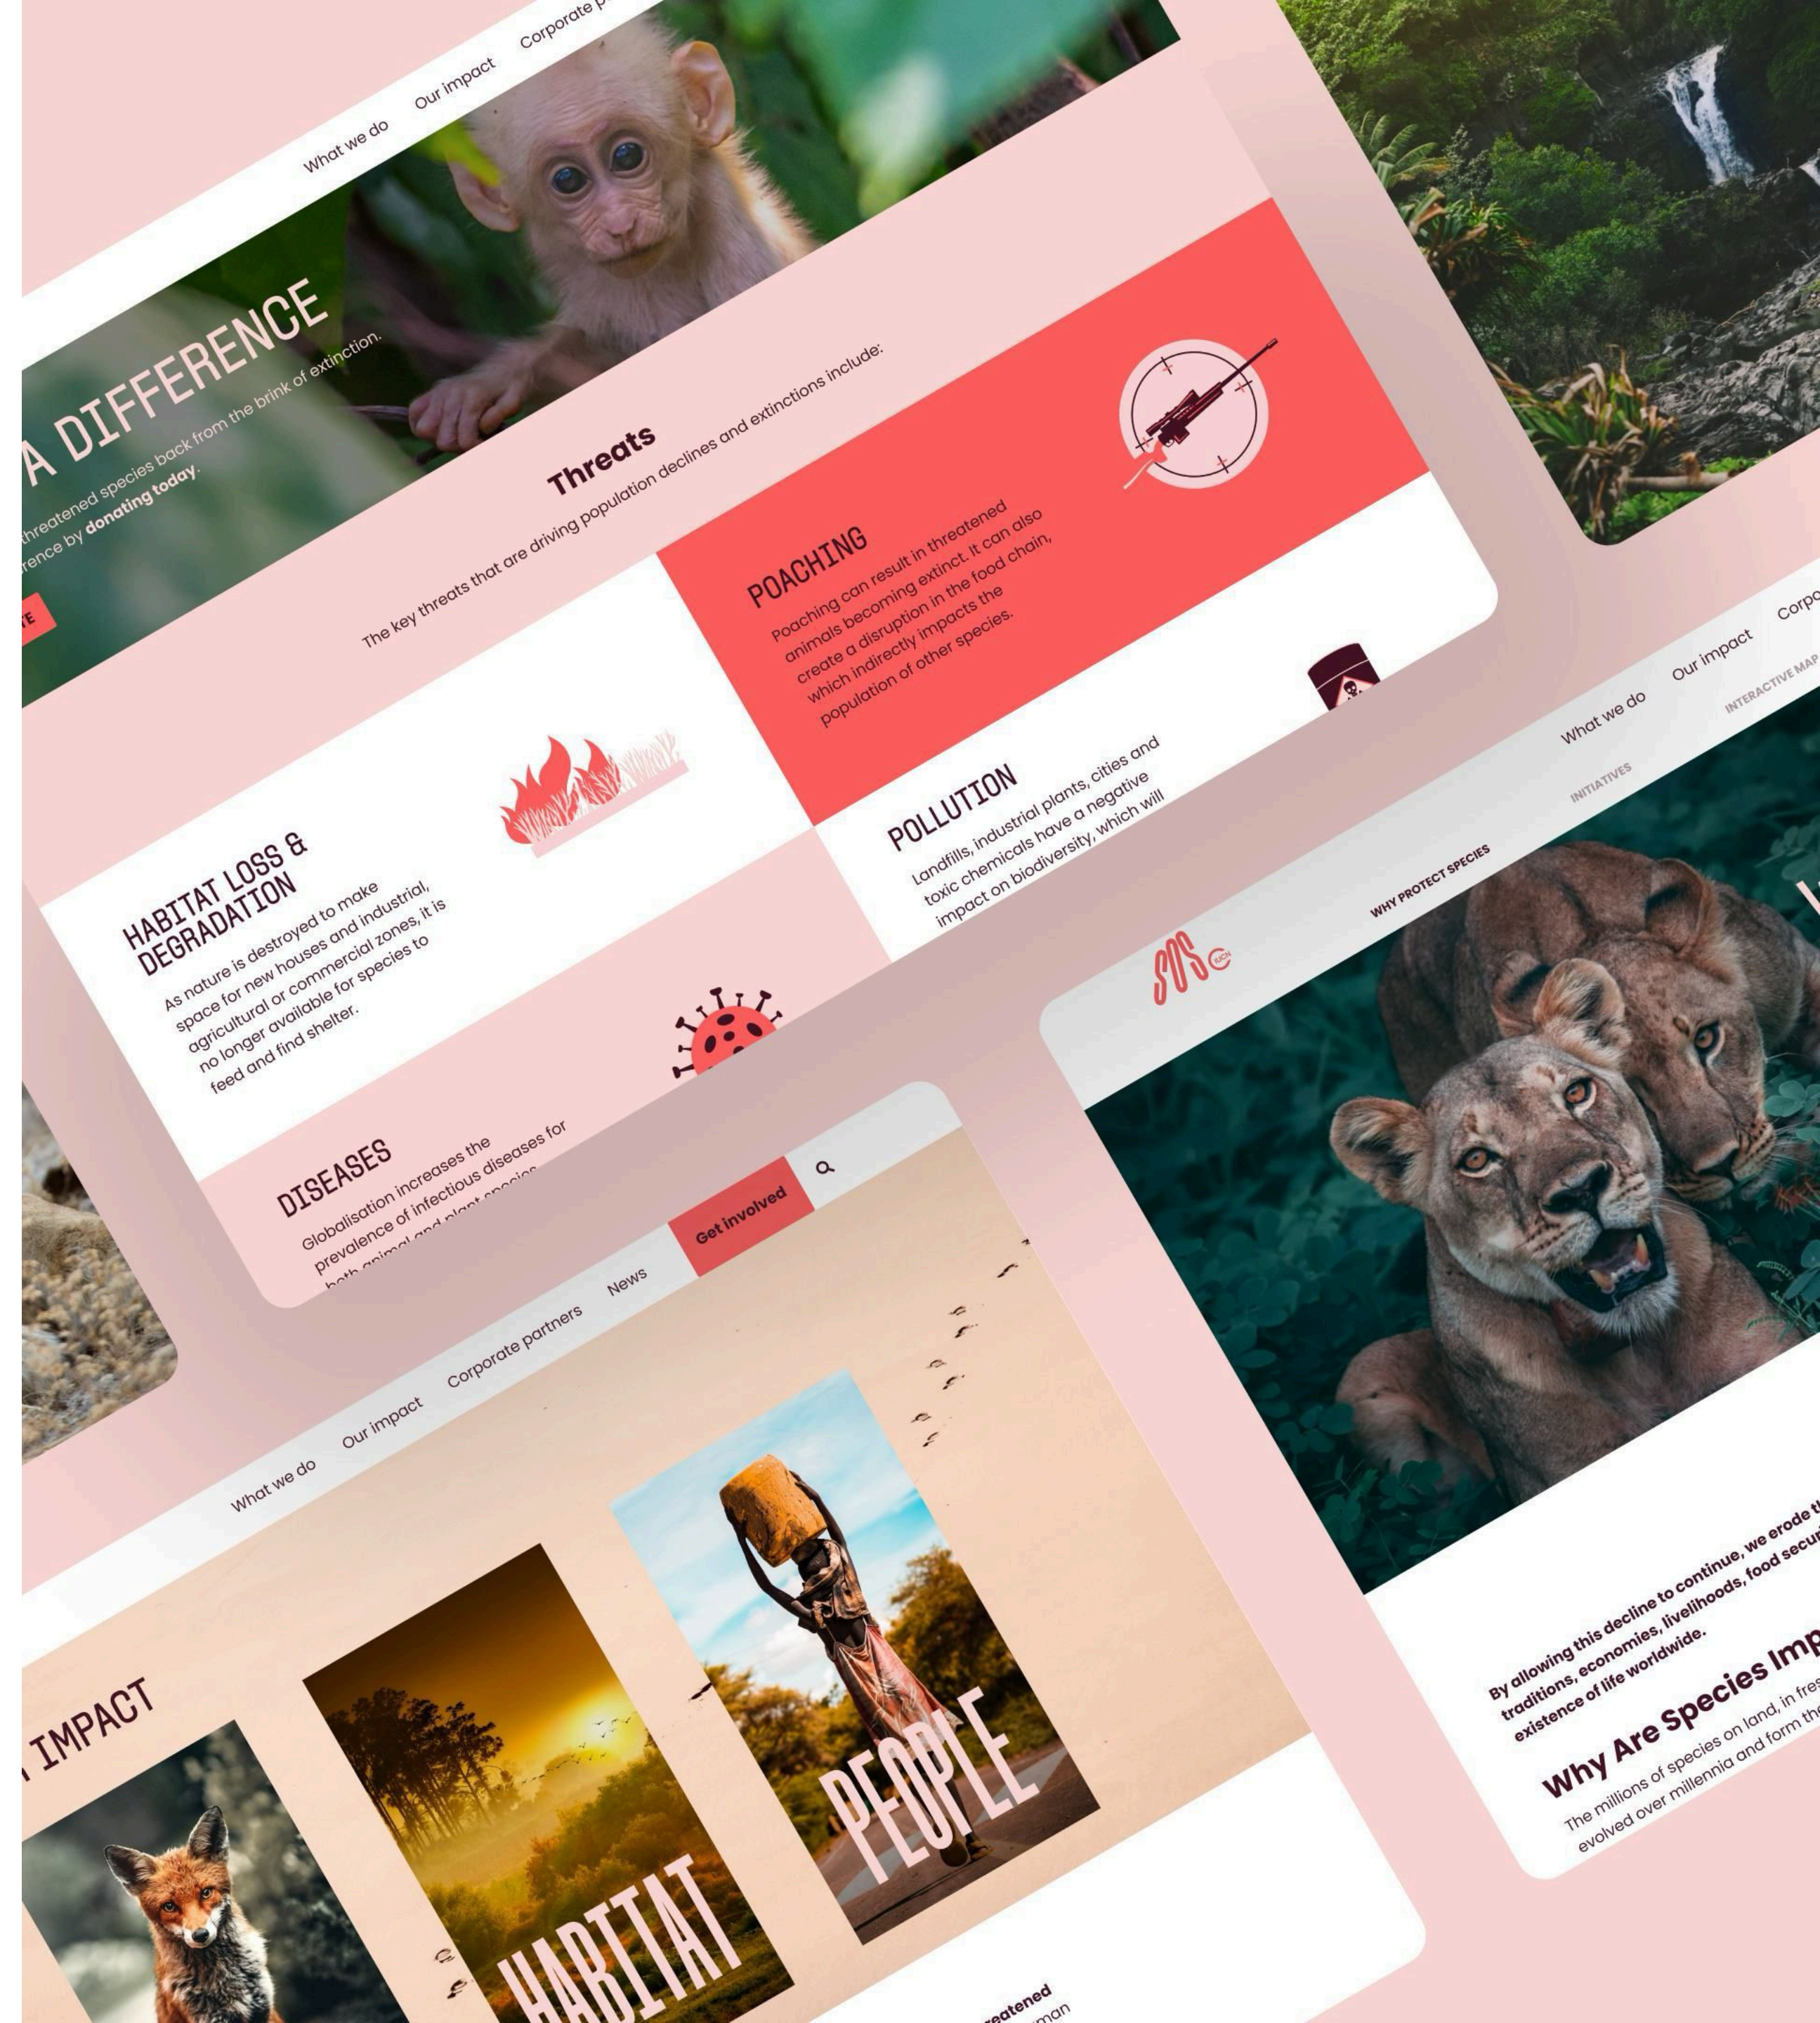

Solution

We designed an engaging, interactive platform that combines storytelling with donation tools to boost user participation. The simplified UX empowers IUCN's team to easily manage and update content across campaigns.

300+ projects

Interactive map

N

ViaBill

Challenge

Upgrade ViaBill’s eCommerce integrations to deliver smoother checkouts, localized content, and landing pages that adapt effortlessly to each market.

Solution

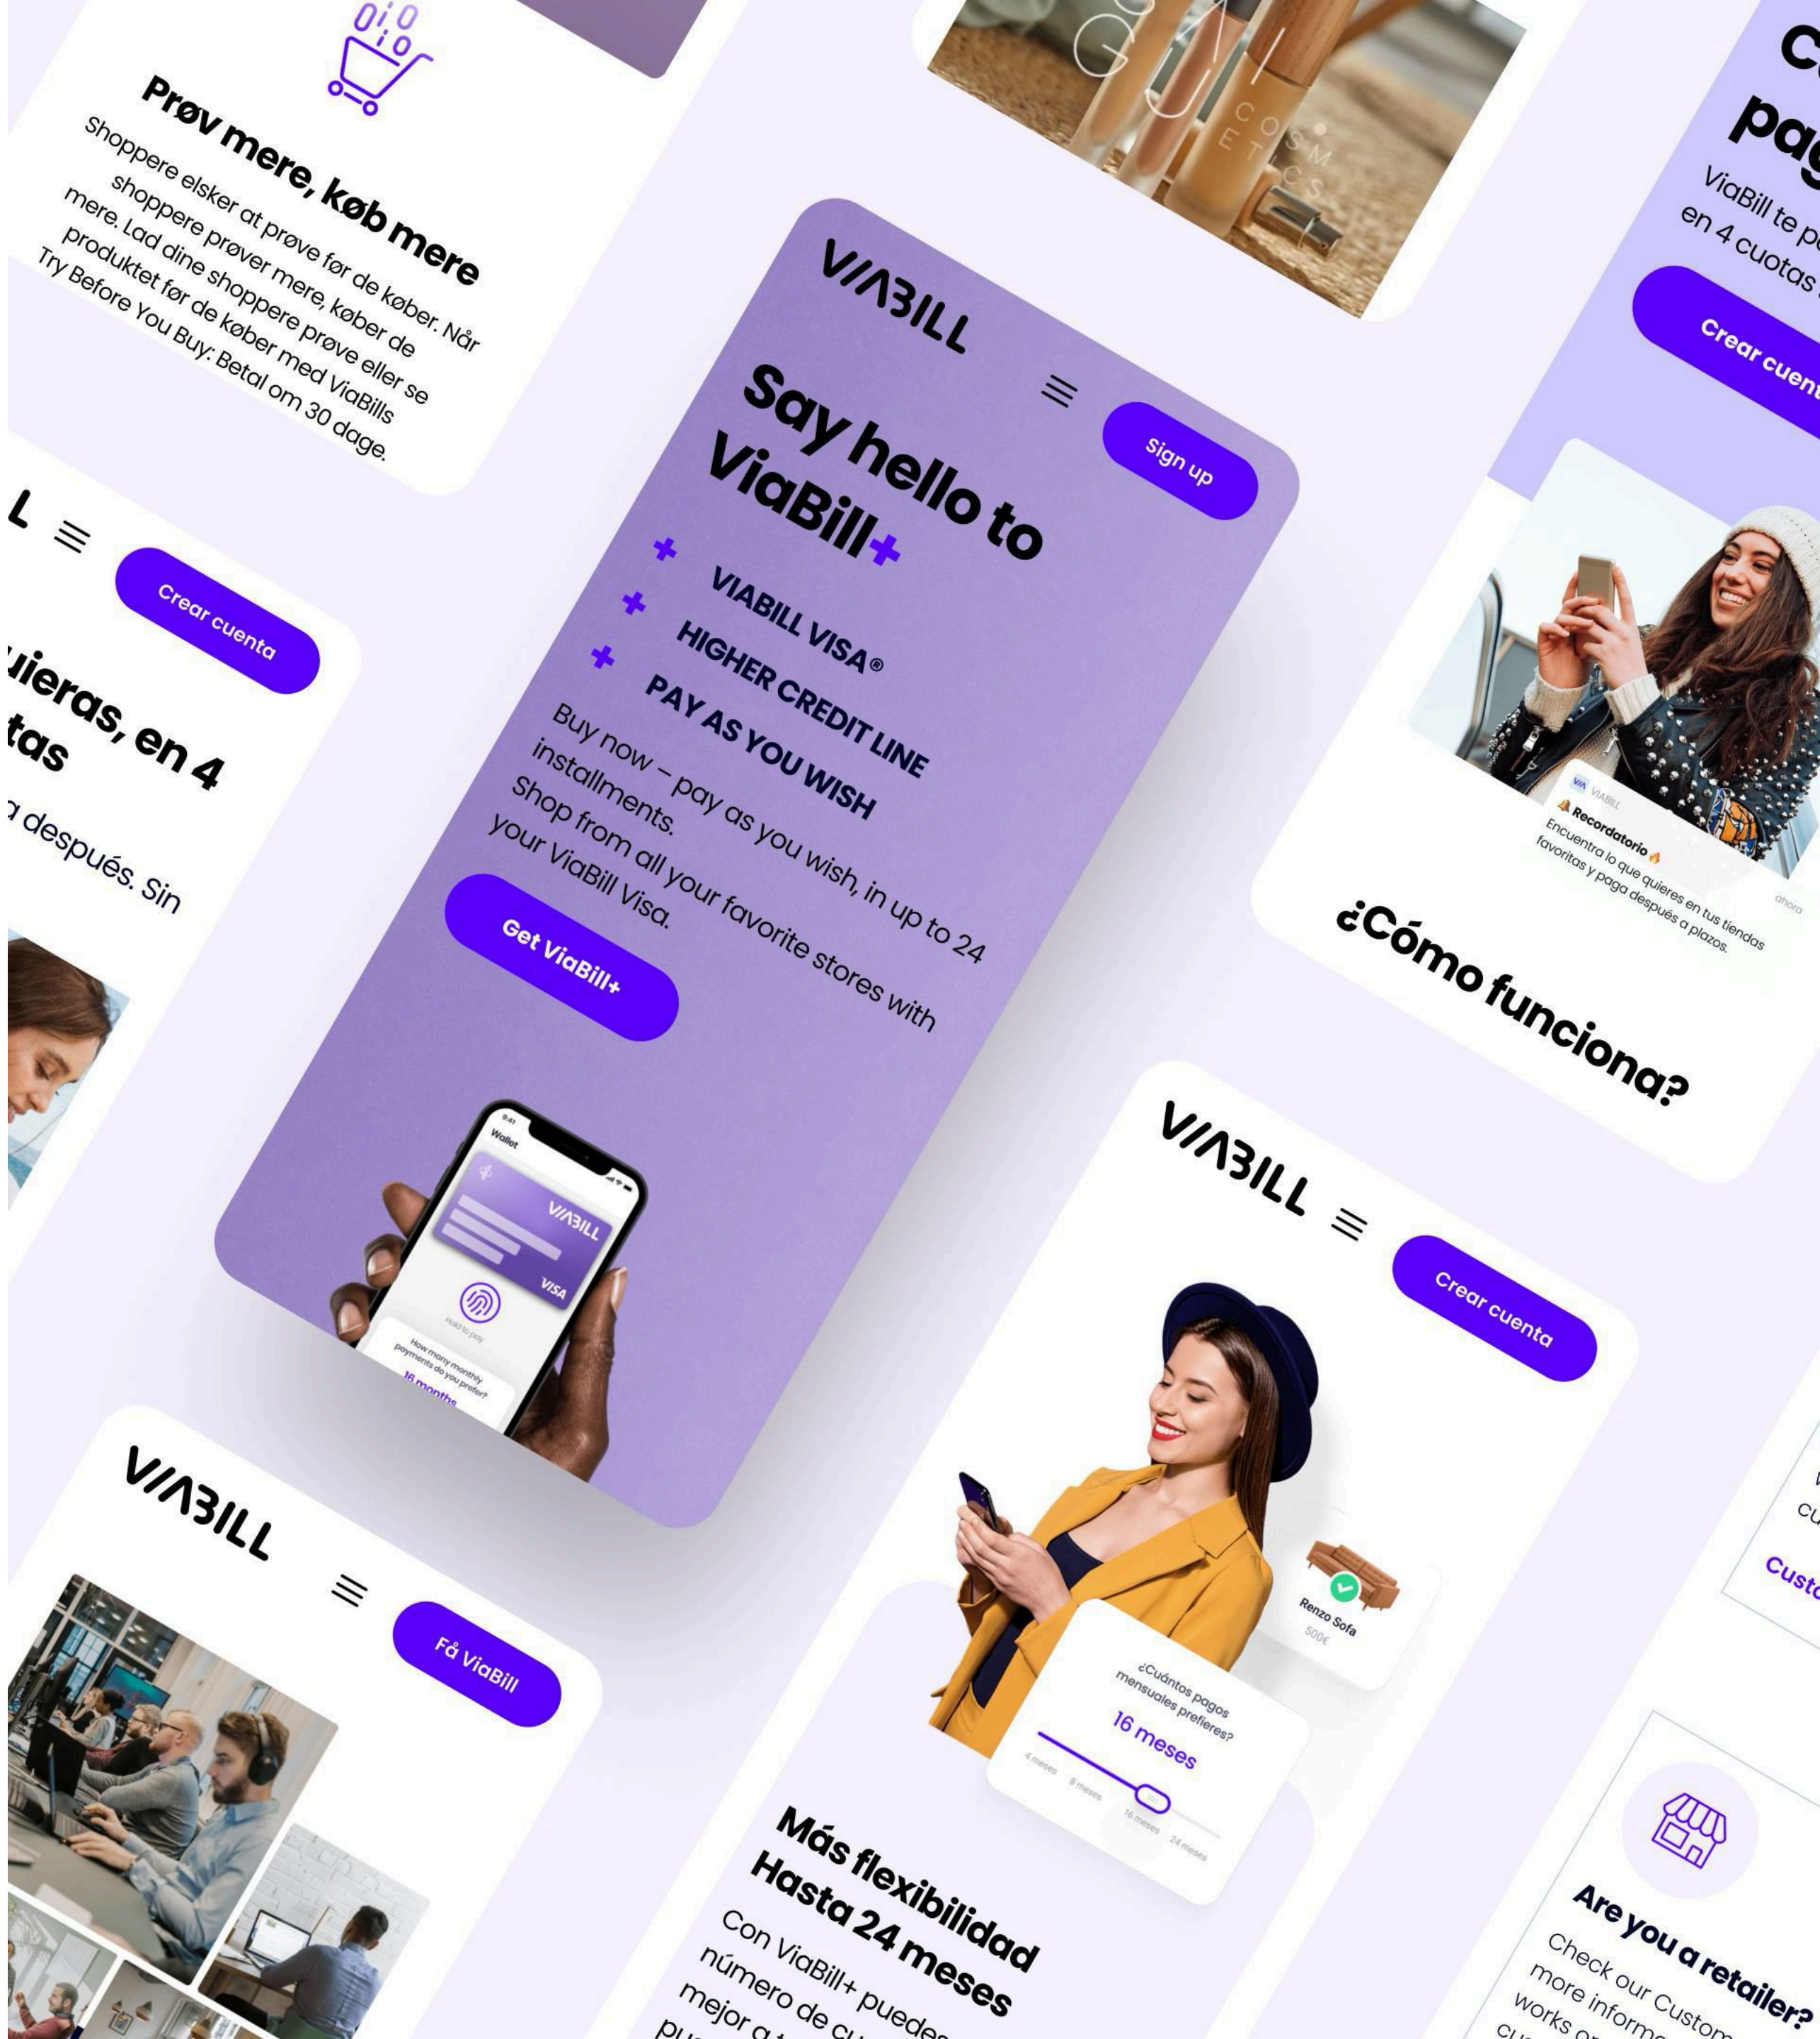

We customized WordPress to make editing effortless - enabling ViaBill’s team to localize content, language, and offers for every region with ease.

PROJECTS

Prince Aviation

Challenge

Prince Aviation required a new website to present a dynamic and growing company.

Solution

We developed a luxury-focused web experience and provide a smooth experience to users with all the relevant information easily accessible, no matter the screen size.

N

PROJECTS

Syskit

Challenge

Create a digital presence that showcases Syskit's innovative approach to Microsoft 365 management and connects them with enterprise clients.

Solution

We designed a modular, fully customizable platform that lets Syskit build distinctive landing pages, tailor user journeys, and showcase their innovation with ease.

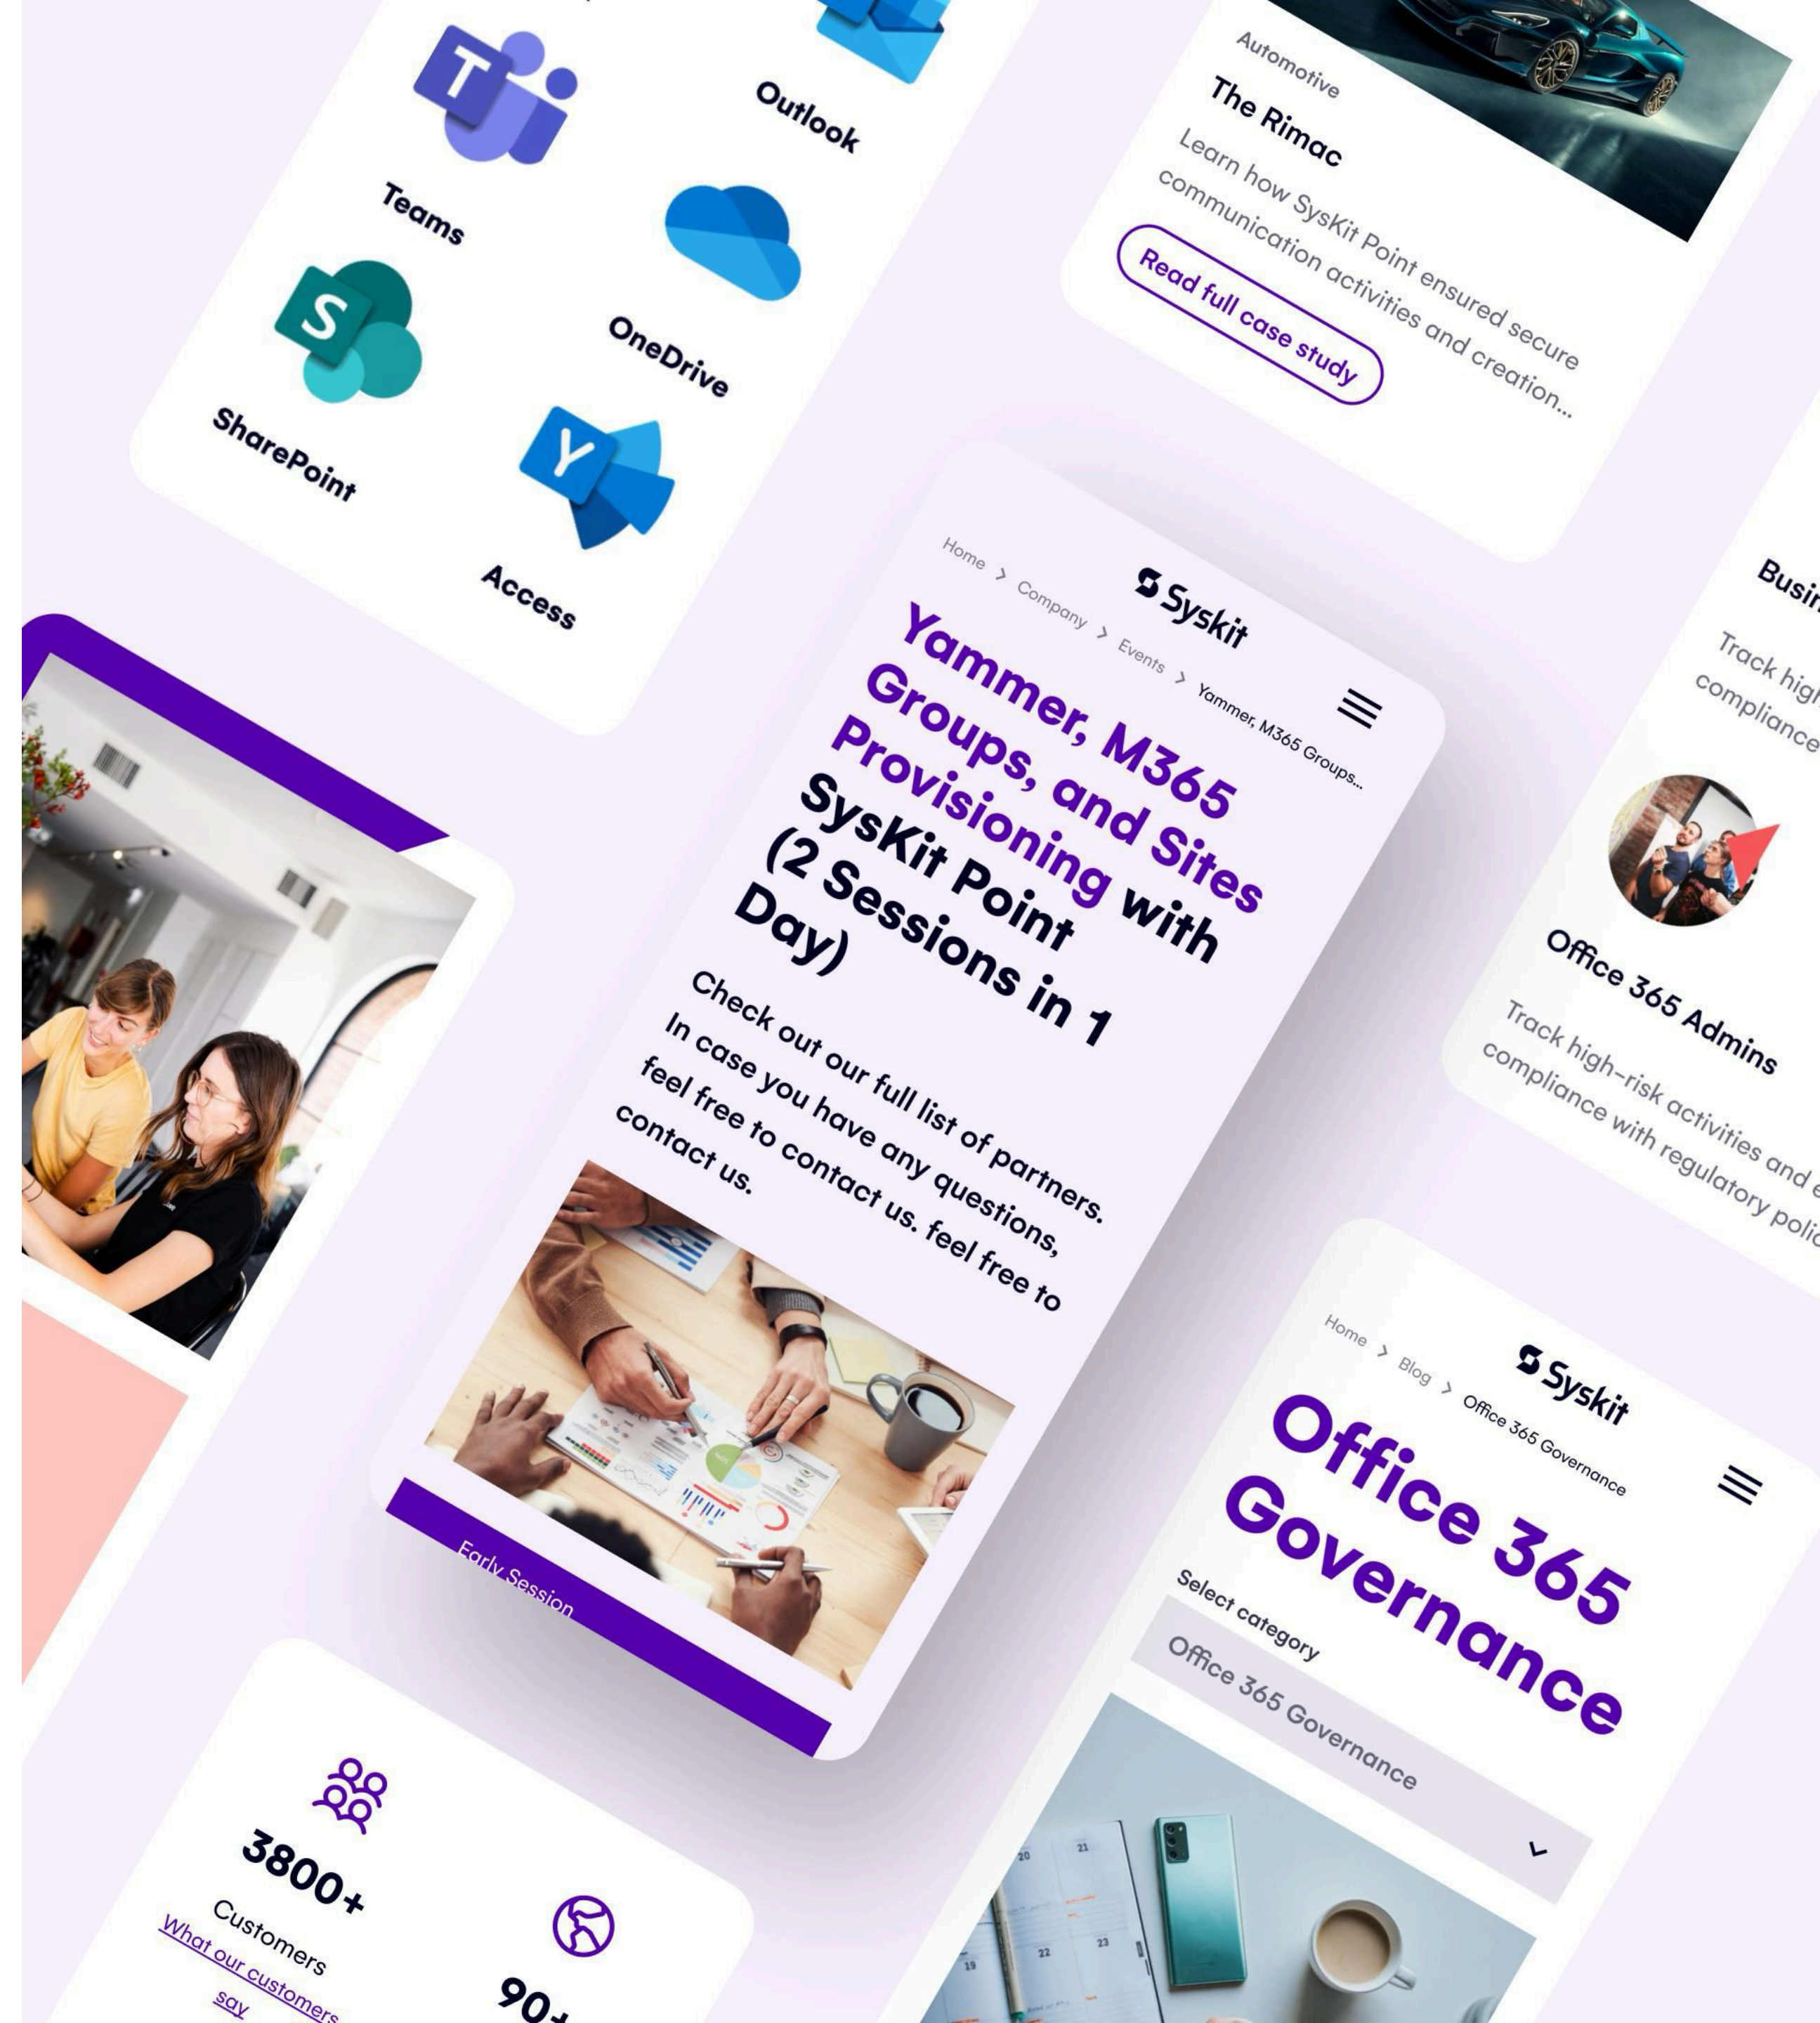

40+ blocs

N

Gemma

Challenge

Gemma needed a modern platform to replace a legacy system with inconsistent product data and manual ordering. With thousands of appliances and a wide B2B network, they required a unified digital experience that could handle complex product flows and showcase multiple premium brands.

Solution

We built an integrated WooCommerce platform with custom APIs, dual navigation for pro and consumer product lines, and a modular ACF system for no-code editing. Brand specific pages, adaptive design logic, and a 100+ icon set create a clear, scalable experience that simplifies procurement and boosts engagement across Gemma’s entire ecosystem.

70% growth
